- Traveling

## PROJECTS

### Smartitude

Smartitude is a test making platform that values a person's core capability of common skills, such as numerical, verbal and diagrammatic reasoning. It offers an effective mechanism for training candidates to become increasingly involved in the recruitment process. Smartitude is built over the popular Material-UI framework on ReactJS and the back-end is based upon the NoSQL database, MongoDB. The project was later bought by STAC Cyberark Pvt Ltd upon recognizing the potential of the enterprise softwares.

### CaterBazar

CaterBazar is an online e-commerce android application that was built for STAC Cyberark Pvt. Ltd. It was intended to be used by caterers and vender's to shift their orders to an online platform that was intuitive and interactive that improved performance.

### LearnEra

LearnEra is an android application that enables students of Rajagiri to view Rajagiri's Student Management System in a simple intuitive application. The application scrapes through Rajagiri's portal to provide an intuitive and simple interface that students can use daily. The application was used by more than 1500 users. I was actively involved in designing and executing the user interface of the application.
